

**Borr Drilling and its employees are committed to protecting the biodiversity of the natural environment surrounding our offshore and onshore operations.**

We do this by being compliant with all applicable local and international legislation and applying best industry practice in our operations. We will consider the life cycle perspective of business processes to reduce the environmental impact of our operations.

Borr Drilling commits to:

- ▶ Developing and maintaining an environmental management system for all operations
- ▶ Pollution prevention
- ▶ Reporting all leaks and spills of hydrocarbons and chemicals
- ▶ Waste management, including waste minimization and segregation
- ▶ Freshwater conservation
- ▶ Energy management and greenhouse gas emission reduction
- ▶ Stakeholder engagement and sustainability reporting
- ▶ Resource management
- ▶ Supply chain sustainability programmes, including procurement of environmentally friendly alternative materials
- ▶ Environmental awareness training
- ▶ Safe and proper material storage and utilization
- ▶ Continual improvement of the environmental management system to enhance environmental performance

Environmental Objectives will be set, and appropriate resources allocated to enable the implementation of this policy's commitments. Environmental performance will be measured and monitored to ensure we are achieving our objectives and targets.

We understand the importance of minimizing the impact on the environment. All of our senior level management support this policy and charge you, our employee, with operating at the highest level of environmental integrity in your own individual capacities. This policy applies to any individual present onsite at any Borr Drilling facility worldwide.
