

Borr Drilling and its employees are committed to protecting the biodiversity of the natural environment surrounding our offshore and onshore operations.

Borr Drilling commits to:

- ▶ Complying with all applicable environmental legislation.
- ▶ Developing and maintaining an environmental management system for all operations
- ▶ Pollution prevention
- ▶ Reporting all leaks and spills of hydrocarbons and chemicals
- ▶ Waste management, including waste minimization and segregation
- ▶ Freshwater conservation
- ▶ Energy management and greenhouse gas emission reduction
- ▶ Stakeholder engagement and sustainability reporting
- ▶ Resource management, including safe and proper storage and utilization
- ▶ Supply chain sustainability programme, including procurement of environmentally friendly alternative materials
- ▶ Environmental awareness training
- ▶ Setting Environmental Objectives and environmental performance monitoring
- ▶ Continual improvement of the environmental management system to enhance environmental performance

We understand the importance of minimizing the impact on the environment. All our senior level management support this policy and request you, our employee and third parties, to operate at the highest level of environmental integrity in your own individual capacities. This policy applies to all individuals present onsite at any Borr Drilling facility worldwide.
