

**Borr Drilling is committed to setting the highest quality standard for drilling services to meet or exceed the needs of our clients and comply with internal and external requirements.**

In support of operating our global fleet of Mobile Offshore Drilling Units (MODUs), Borr Drilling has implemented the Borr Management System (BMS), a state-of-the-art platform designed to enable and encourage continuous improvement in all we do.

Borr Drilling will regularly evaluate and monitor feedback from our clients in order to measure our performance and strengthen our capability to meet the requirements of our clients and the expectations of other key stakeholders.

We will provide our clients with drilling equipment, tools, and services that are reliable, cost effective, and of the highest quality. We will actively pursue quality improvements through programs that enable each employee to do their job right the first time and every time.

Our Quality Policy Objectives are:

- ▶ Continuous client satisfaction
- ▶ Continuous quality improvement
- ▶ Strict adherence to the quality management system
- ▶ Consistent monitoring of client requirements
- ▶ Consistent monitoring of regulatory requirements

We commit to our clients, employees, and communities that we will work diligently to ensure that our quality is uncompromised.
